

SAVING LIVES THROUGH SMS

FrontlineSMS:Medic's mission is to help health workers communicate as well as use electronic medical records and diagnostic tools, all via mobile phones.

Mobile telephony is the broadest reaching digital communication technology in the world, and it has untapped potential to facilitate continuity of care over distance.

EMERGENCY CARE

40 mile walk is no longer the only means of alerting professionals & immobile patients can receive emergency care.

STATUS UPDATES

Potential to facilitate continuity of care over distance & receive patient updates.

GIVE TWO PILLS DAILY

DRUG INFORMATION

Informs CHWs of proper drug dosages and uses.

TREATMENT SUPPORT

The SMS network connects point-of-care questions with answers from the clinic.

REFERRALS

Lets the clinic know the patient is on his/her way to the clinic for treatment & communicates the nature of the problem.

MOBILIZATION

Connects patients to support groups & the public to testing and immunization schedules.
